- 7. Civil _____
- 9. The thing we drive our

Introduction

Civil Engineering is a type of engineering that focuses on developing the physical world around us to make our lives easier. Civil Engineers design, maintain and construct things such as buildings and towers, bridges, roads, railways, and pipelines. Civil Engineers solve big problems that can range from communities not having access to clean water to designing an earthquake-proof building. Enjoy the funletter! [Click here for the solutions.](#)
